

Dragon PowerMics must be replaced before July 21 OEE Go-Live

Old microphone that will **not** work for
Fluency Direct

New microphone that **must be used** for
Fluency Direct

Are you or another Corewell Health East physician, resident, or APP utilizing a PowerMic for Dragon Medical One dictation in an Inpatient setting?

To prevent dictation disruption during the One Epic Ecosystem (OEE) go-live on **July 21**, digital services must distribute new **M*Modal Fluency Direct** by 3M Olympus microphones to replace the existing PowerMic hardware utilized for **Dragon Medical One**.

Why is this occurring?

As a part of the transition to the Corewell Health Epic instance on **July 21**, Corewell Health East's dictation tool, **Dragon Medical One**, will be retired and replaced with the Corewell Health standard dictation tool, **M*Modal Fluency Direct** by 3M.

Call to Action

1. Share this flyer to help spread awareness throughout Corewell Health East.
2. Complete the [Dragon Medical One Hardware Questionnaire](#) from a Corewell Health East computer by **July 17** to help ensure that any current microphones you may be using have a replacement available before go-live.
3. If you have any questions, please email CHEhardware@corewellhealth.org.
4. Learn more about using M*Modal Fluency Direct via the [M*Modal Fluency Direct Configuration and Personalization](#) course, available in Workday.
