

Macros & Smart Phrases Tips/Tricks

Macros

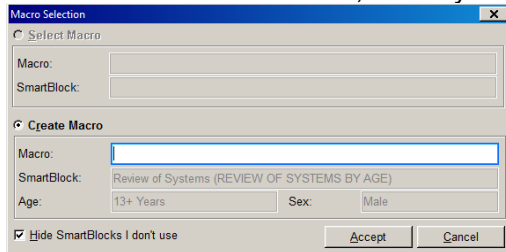

NoteWriter can help you document a typical exam or procedure more efficiently. A macro is a set of signs, symptoms, and pertinent negatives that you commonly record during a ROS or physical exam, or information that you commonly record in a procedure note.

Create a Macro on the Fly

1. After making your selections on the **ROS**, **Physical Exam**, or **Procedures** tab of the NoteWriter, click  to the right of the pencil and select **Create macro from current data**.

2. In the Macro Selection window, name your macro in the **Macro** field and click **Accept**.

3. Macro button is created.

Things to Remember

Clear Macro by clicking Eraser, this will erase all data

Delete Macro- within **Macro Manager** {search macro manager within Search box}

Within Macro Manager, you have the option to **delete**, **edit** and **re-arrange** the order of your Macros

Available macros (click and drag on the Rank column to reorder):

Rank	Active	Display Name	Restrictions	Edit	Hide	Delete
1	Yes	Diabetes			<input type="checkbox"/>	
2	Yes	Diabetes			<input type="checkbox"/>
