The last few months have not been easy. This time has been anything but business as usual. But just as Beaumont led through the pandemic, we will continue to lead now with our expertise, leadership and innovation.

Beaumont is open. Beaumont is safe for you and your patients. And Beaumont is ready to bring back your patients to receive the care and treatment they need and deserve.

Dr. Nick Gilpin is system director of Infectious Disease and Epidemiology, and one of many physicians in the forefront of this pandemic. He confidently shares our sentiment. See his video here: https://youtu.be/4tPSf58ph6Q

Reopening services and facilities is being done with careful consideration. Protecting our physicians and staff is of the utmost importance.

- You will continue to receive appropriate PPE.
- Safety precautions and cleaning protocols are in place. All COVID-19 and non-COVID-19 patient care areas are regularly and thoroughly cleaned and disinfected.
- Our emergency centers have separate non-COVID-19 areas to protect all those who need emergency care.
- Screening for COVID-19 symptoms for all upon entrance to acute care campuses and outpatient centers is in place.
- Acute care campuses have designated areas for non-COVID-19 patients, separate from COVID-19 inpatient units.
- Patients arriving at the acute care campus for imaging, cardiac testing and other appointments, regardless of symptoms, will receive a face mask upon request.

In the immortal words of The Beatles songwriter George Harrison, here comes the sun!

Moving forward, my commitment to you is that we will slowly roll out a schedule for surgeries and screenings as well as protocols for medical appointments and more.

- On a regular basis, we will send you email updates explaining what’s new and how we are working every day to safely bring more services back online.
- Beginning tomorrow, Beaumont is launching a consumer campaign encouraging patients to return to Beaumont. We have been leaders through this pandemic, and we will lead us out.
- We will hold a Webex session to discuss our rollout plan. An invitation will be coming soon. Please join us as you and your colleagues will likely have many of the same questions.

We’ll continue to get through this together, as we focus on safely bringing your business back by taking care of your patients throughout the region.

Jeffrey S. Fischgrund, M.D., Chief, Clinical Care Programs, Beaumont Health
Chairman, Department of Orthopaedic Surgery, Beaumont Hospital, Royal Oak
Professor and Chairman, Orthopaedic Surgery, Oakland University William Beaumont School of Medicine
