

## COVID-19 Visitation Information

To protect our patients, families, and staff during the COVID-19 pandemic, we have put guidelines into place that limit visitation until COVID-19 is no longer a threat. We know that these are trying times; therefore, we have launched new ways of communicating through phones, smart phones and tablets to keep you connected with your loved ones.

### General Information

#### EVERYONE visiting, regardless of COVID vaccination status, must:

- Be free of COVID symptoms and a COVID diagnosis and must not be under evaluation for COVID.
- **Wear a face mask that fits well covering the nose and mouth at all times. Valved masks are not permitted. If you do not come with an appropriate mask, one will be given to you. Any person refusing to wear a mask will not be allowed to visit.**
- Practice social distancing, keeping 6 feet from others at all times.
- Stay in the patient's room at all times except when using the bathroom or purchasing food.
- Clean hands each time you enter and exit a patient care area.
- Remove gloves while in a Beaumont building.
- Leave the Beaumont building as soon as your visit is over.

**A person may eat** in single patient rooms or multi-patient rooms IF there is not a roommate. If there is a roommate, the support person must eat in a non-patient area as designated by staff.

**Anyone under the age of 16 is not allowed to visit** patients in the hospital, except under extreme conditions as approved by leadership.

**A person visiting may be asked to leave** a patient care area if safety or social distancing cannot be maintained.

**Each person visiting must complete a Health Assessment** by answering COVID-19 screening questions each time they come to Beaumont.

- People screening positive will not be allowed to visit.
- People screening negative will be given a "sticker" that must be worn at all times.

**When needed, additional Personal Protective Equipment (PPE) will be provided by Beaumont and must be worn at all times.**

#### COVID-19 Screening

- ✓ COVID diagnosis in past 10 days
- ✓ COVID test pending
- ✓ Exposure to someone with COVID within past 14 days
- ✓ Fever > 100.0° F
- ✓ New cough
- ✓ New shortness of breath
- ✓ New flu like symptoms such as body aches
- ✓ New onset diarrhea
- ✓ Recent loss of taste or smell

**If you are at high risk for COVID-19 complications**, please stay home. See below for ideas on how to stay connected using phones and other technology.

#### Connecting with the Patient

- Call hospital "in-room" phone.
- Use cell phone, tablet or laptop for calls, video chat, or text messaging.
- Patients may borrow a Beaumont-owned iPad or tablet to connect with you via Video App. Directions for Apps can be found here [patients](#) and [family members](#).
- Record messages, music, prayers etc. and give to your loved one's nurse so they may play it for them.

#### Connecting with the Health Care Team

- Select one person to be your "family contact person" who will talk with health care team members.
- Set up a schedule with your loved one's nurse to receive daily updates and participate in medical discussions, shift change report, or discharge planning.
- Ask if you may get text message updates. A signed consent from your loved one will be required.

## Visitation Guidelines

### *Patients who do not have or are not suspected of having COVID-19:*

- **From 8 a.m.- 8 p.m.**
  - Two support people each day are welcome at the bedside, regardless of vaccination status. Support people may alternate during the day, exchanging in the lobby or outside the hospital, up to three exchanges per day.
- **Overnight** (providing space allows and safety can be maintained)
  - ONE support person or parent/legal guardian:
    - Children (21 years of age or under) not in NICU.
    - Patient in serious or critical condition or on hospice care.
    - Adult with disability who needs help with mobility, communicating or managing anxiety.
    - Laboring woman. Approved doula may be present in addition to support person.
  - TWO support people:
    - Patient at end-of-life.
    - A laboring woman may have birth partner and a second person IF the second person is a doula.

### *Patients who have been diagnosed with or are suspected of having COVID-19:*

- Visitation is restricted.** No one will be allowed in rooms of patients who have or are suspected of having COVID-19 except:
- ONE support person or parent/legal guardian may be present:
    - Pregnant woman in labor, pre-term labor, or requiring C-section, pre-natal testing, procedure, or genetic counseling.
    - Child who is 21 years of age or under.
    - Adult with disability who needs help with mobility, communicating or managing anxiety.
    - Patient being admitted to the hospital. Once the patient has registered, the support person should leave the building.
    - As approved, patient who needs a support person to learn how to care for them after discharge.
  - TWO support people may visit a patient who is being evaluated for hospice care or nearing the end-of-life.

## **Surgery, Outpatient and Emergency Center Care**

- **Outpatient appointments – If needed for the physical or emotional health of the patient:**
  - **Each patient may bring ONE support person with them.** Children under 21 may come with TWO parents/legal guardians. Others must wait outside of the building until the patient is ready to leave. Patients must not bring children <16 to their appointment and must reschedule the appointment if childcare is not possible.
- **Outpatient Lab and Imaging –**
  - Children are welcome during outpatient Lab appointments. For Imaging (e.g., X-ray, ultrasound, etc.), children are permitted in the waiting rooms if the patient brings another adult to supervise them.
- **Pharmacy -**
  - Patients are welcome to bring their children when picking up medications in the Beaumont Outpatient pharmacies.
- **Emergency Center (EC) -** Unless the support person is essential to the patient's care as per the exceptions listed above, each site's leader determines whether the support person may stay after the patient is registered or received by an EC staff member. If unable to stay, the support person will be provided with a phone number to call to check on the patient's status and return to their vehicle. Please check upon your arrival to the EC.
- **Surgery -** One support person may be present in the Waiting Room for the duration of the surgery, in Pre-Op (once the patient is settled) and Post-Op for discharge instructions. Two support people/Parents/Legal guardians for children under 21 may be present.

*Everyone who is age 5 and older, regardless of vaccination status, must wear a mask that covers the nose and mouth while in our facilities. Additionally, due to MIOSHA regulations, all patients and family members will be screened for COVID-19 symptoms at building entrances.*
