Engaging and supporting Beaumont doctors

Your physician weekly bulletin

We continue to have lots of positive energy and activity in the Beaumont system. This week you'll learn about:

- new Beaumont ambulatory sites in an article by Carolyn Wilson, EVP and COO
- *oneChart Care Everywhere* expansion and its benefits for you and your patients
- a helpful paper on prescribing exercise for adults
- the date for the September palliative care conference

And, from what I understand, a [link to the pain management series](#) did not work in last week's bulletin. Sorry for any inconvenience.

Over the past few months, Carolyn Wilson, executive vice president and COO, has presented Beaumont Health's plans for [ambulatory campus development](#) to physician groups in our system. In this article, she shares Beaumont's goal to expand geographic presence in areas of high growth, specifically in northeast Macomb and Novi/Northville. It's an exciting prospect for growth and alignment opportunities for you.

Also, we have a couple of IT updates, starting with ***oneChart Care Everywhere*** functionality which expanded in June. This expansion and implementation of eHealth Exchange connects Beaumont to a larger participating network. It expands your ability to request patient records from other Epic organizations that also participate in eHealth Exchange. Implementing eHealth Exchange is the first step for Beaumont to ultimately be connected to federal data sources such as the social security administration, department of defense and VA.

Earlier this week, **OnBase scanning** went live at Dearborn, Taylor, Trenton and Wayne with updates at Farmington Hills, Grosse Pointe, Royal Oak and Troy. OnBase integrates with *oneChart* to make your content management experience easier. There are view enhancements to the *oneChart Media* tab and additional changes, which should help integration efficiencies and improve access. For IT questions, feel free to call the service desk at 888-481-2448.

More than 200 physicians have attended strategic planning sessions in Grosse Pointe, Troy, Trenton and Novi to help shape the **three-year strategic plan**. If you have not attended, I highly encourage physicians from any Beaumont site to register and participate in our [last session Aug. 6](#) at the Dearborn Inn. The input thus far has been very helpful and much appreciated. I plan to share the feedback from all sessions in a future bulletin.

Also of interest, I'm pleased to share a valuable resource for encouraging your patients to exercise was recently published by Dr. Barry Franklin, director of Preventive Cardiology and Rehabilitation, entitled "**Prescribing Exercise for Adults**." This [paper](#) includes valuable information on terminology, exercise intensity, risks and encouraging responses, to name of few sections, and can help you to motivate patients to exercise. Beaumont has an enterprise subscription, so place a link on your desktop or laptop for easy reference. You can also go to the new provider website, provider.beaumont.org, under the Education tab, in the UpToDate section. UpToDate has several resources that may be of interest to you.

Finally, the annual **palliative care conference** is set for the morning of Friday, Sept. 28. I understand that many of you are eager to register for this each year. You can now save the date or [register](#).

I hope this is a productive week for you!

Sincerely,

A handwritten signature in blue ink that reads "David P. Walters, D.O."

David P. Walters, D.O., MHSA
