Microsoft Outlook: Configuring on iOS

Users should access their Beaumont email from a mobile device using the Microsoft Outlook application only. Using any other email application results in a blocked email message. If the user receives this message, they must confirm no other email applications contain their profile.

Note: Users can delete the current email account on their iPhone/iPad by tapping **Settings**, then **Mail, Contacts, and Calendars**. Tap the **Beaumont/Exchange** account, and then tap **Delete Account**.

How to Setup Microsoft Outlook App on Apple iOS Devices

1. Search and download Microsoft Outlook in the App Store.

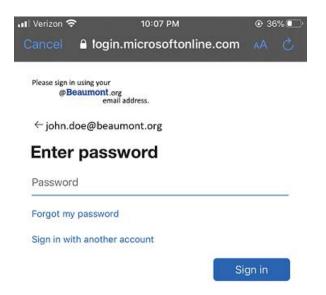

2. Open the Outlook application and type in Beaumont email address Tap Add Account. Note: Please use <u>firstname.lastname@beaumont.org</u> (i.e. john.doe@beaumont.org). Do not use @contractor.beaumont.org or @beaumont.edu.

	Add Account	
	Enter your work or personal email
