

# Beaumont

Dec. 29, 2021

---

On Dec. 24, the Centers for Disease Control and Prevention revised their isolation period recommendation for asymptomatic or mildly symptomatic health care workers who test positive for COVID-19. Beaumont Health will follow these new recommendations, effective immediately. **If you tested positive for COVID-19 and are asymptomatic or mildly symptomatic, you should re-test on day seven and return to work if you receive a negative result.**

Employees will need to submit proof of a negative rapid antigen test, including name, date tested, and location tested, to Employee Health & Safety in order to receive clearance to return to work earlier than 10 days. Please note that EHS is not offering COVID-19 testing at this time.

Employees ready to return to work should call the Employee Hotline at 947-522-3466.
