

Are you prepared for the upcoming Heparin protocol standardization?

Heparin is one of the most used systemic anticoagulants at our acute-care campuses, however, the protocols and management have varied across sites.

On Tuesday, Sept. 14, providers, pharmacists and nurses will see Epic/*one*Chart improvements in patient care delivery and a reduction in variability across sites as Beaumont Health will standardize the adult and pediatric protocols to be weight based. **Your preparation is required.**

- [Providers click here to learn more about how this will impact you.](#)
- Pharmacists review the HealthStream training modules assigned to you. Didn't get assigned modules? Contact your manager.
- Nurses review [Heparin Tutorials](#). Onsite educators will also be available for reference at go-live.

Have questions? Please contact the Service Desk at 888-481-2448 or via [the web](#).
