BHapps Login Screen Changes Take Place in Early August

In early August, minor changes will be made to the BHapps login screen when BHapps is accessed remotely. Any Corewell Health East team member who accesses BHapps when off network, when using a non-Corewell Health device, or when using a mobile device will see the login screen change. This change only impacts the look and color of the BHapps login screen presented. This change does not impact the functionality of Bhapps, or how a team member accessing and logs in to BHapps. The login screen is not changing for team members who access BHapps using a Corewell Health issued device connected to the network (onsite). Learn more about what the new login screen will look like here.
