

Email addresses will soon change to @corewellhealth.org

All existing Beaumont email addresses will change to @corewellhealth.org.

Don't worry, you will still receive your emails!

- You will continue receiving emails sent to previous addresses (@beaumont.org, @beaumont.edu, etc.) which will auto-forward to your @corewellhealth.org email
- Any emails you send will be sent from @corewellhealth.org

These changes start Jan. 30 and are based on your location in Cactus

Email changes will occur with the Microsoft 365 Migration of the Beaumont Health environment into the Corewell Health environment which takes place in waves starting Jan. 30. The [waves](#) are happening by **location** (such as Royal Oak, Dearborn, etc.) based on where you are **primarily privileged at**.

What do you need to do

- Watch your email for a confirmation of your specific migration date
- The day of your migration, you will not be able to access email from 3-7 a.m. as the content is transferred
- You will then receive a prompt on your computer the next time you sign in to complete the migration

Accessing email on a mobile device

You will experience some changes to how you access email:

- Use the Outlook mail app; you can no longer use a native mail app on your personal device
- Log into the Outlook app with your new @corewellhealth.org email once you are migrated
- Confirm your identity through PingID
- Approve the prompt the first time you login to the Outlook app

Other changes to know

- Microsoft Teams meetings will still function after migration, but you will not be able to record
- If a recording is necessary, the organizer must reschedule the meeting
- If you have shared any documents saved to your OneDrive, you will need to reshare as the hyperlink will change
- In March, Teams and SharePoint will be migrated
