**Beaumont**

# IT's Current High-Level Focus

Topic	Details
BHSH Integration	See <a href="https://www.beaumont.org/integration-and-advancement-of-digital-and-technology-platforms">Integration and advancement of digital and technology platforms (beaumont.org)</a> for further details.
Taylor Telephone System Refresh	An August 4 go-live is currently projected to replace their 30+ year old telephone system along with 400 new telephones and convert over 230 voice mailboxes along with 13 call menu's and 850 analog lines that support faxing and patient phones.
E-911	A project is underway to bring Beaumont in compliance with FCC regulations to protect any user who dials 911 from a Beaumont hospital so that emergency response teams know where to find that caller down to a 7,000 square foot radius and providing location address. The project is anticipated to run through the first quarter of 2023 and will impact all Beaumont acute-care campuses.
ITC Data Center Move	IAM Engineering initiated development to transition the production Oracle Internet Directory (OID-Prod) Server to the new Oracle Internet Directory Servers which supports the ITC Data Center Move that is part of the IT System Modernization and Optimization project
PCI Assessment	Work continues with KPMG interviewing Key PCI stakeholders across the organization to remediate gaps in compliance.
Q2 User Access Reviews	Follow up and summarize Q2 User Access Reviews for PeopleSoft (combined HCM and FSCM) and EPIC "Super Users."
Intersystems Ensemble Interface Engine	Effort continues to upgrade this interface engine, which will bring the level up to the current available IRIS version. Testing is at an estimated 70% completed, with an expected cutover and implementation during Q3 2022.
Population Health	Pneumococcal Health Maintenance aligning with Epic Foundation released content from custom build.
PACS	Ambra Electronic Image Sharing will allow Beaumont to share patient imaging exams with outside facilities and providers. It will also enable patients to view and manage their images through their <i>myBeaumontChart</i> link.
New Community Connect offices	Four new independent Community Connect offices are slated for Q3 go-lives. Welcome to Epic: Dr. Clara Kamath-Wood PLLC, Novus Primary Care PLLC, Kidney Care Consultants PLLC and ONR 21 PC!
Community Connect Power User Community	The IT Physician Services team has been collecting primary power users from our Community Connect partners. Clinic, Office and billing power users will be collected across the system through conversation with the Account Management team to aid in future integration and communication
Clinical Informatics Site Rounding	Will kickoff at Beaumont, Troy and then round at other sites examining IT difficulties experienced at each site and who is the contact to assist.

# Recent Accomplishments for Beaumont Board consideration

**Announced IT's Digital and technology integration decisions.** Click the following link for more details:

[Integration and advancement of digital and technology platforms \(beaumont.org\)](https://www.beaumont.org/integration-and-advancement-of-digital-and-technology-platforms)

**Implemented Multi-Factor Authentication (MFA) security layers into additional applications, such as Epic Haiku, Canto and Rover.** Feedback and risks raised were taken into consideration and implemented swiftly for enhancements that align with our mission, vision and values. MFA enforces stricter login security standards by requiring the team member attempting to log into an application to prove that they are really who they say they are. Different applications are using different means of MFA, such as only being available on the Beaumont network, requiring Single Sign-On technology, Duo identity confirmation, or emailing a six-digit activation code that must be entered on the login screen. MFA reduces the risk of inadvertent access and exposure of private clinical and financial information.

**Onboarded and trained 269 new residents and fellows to access and use our patient/provider-facing IT systems, such as Epic/oneChart, to provide patient care starting July 1,** a remarkable accomplishment requiring the collaboration and coordination of many teams within IT including Healthcare Applications Education Team and Informatics.

**Beaumont Behavioral Health successfully transitioned from an IT implementation project to an operational account management status.** BBH has successfully become our newest Community Connect partner and their relationship with IT promises to be fruitful.

## **MyChart Patient Engagement Enhancements**

- Multi-Factor Authentication was enabled for MyChart using both email and text messaging to send validation code bringing the system into alignment with cybersecurity requirements.
- MyChart billing notifications were enabled for text messaging. Google Pay and Apple Pay were enabled in both web and mobile MyChart for payment of the patient balance or payment plan.
- Approximately 140 CT orders with contrast were enabled for ticket scheduling allowing patients who have a CT order in Epic to receive a ticket allowing them to schedule their procedure at the location and time they choose.

# Recent Accomplishments additionally noted

Launched the Clinical Services – Trauma dashboard on June 16. The dashboard provides an overview of Key Performance Indicators (KPI) as well as the ability to dive deeper into the KPIs for in-depth analytics. KPIs are comprised of metrics considered key operational care measures. All data may be filtered by month, hospital, department, admitting/attending physician, payor, patient age and patient class.

Completed network upgrades in June for:

- Royal Oak – 2nd Floor Pediatric Surgery
- Taylor – Phase 1

Ported 6,232 telephone numbers at Dearborn, which moves most call traffic from the public switched telephone network to our corporate solution. The move will allow us to disconnect legacy circuits, resulting in \$32k savings per year.

Eliminated approximately 2,500 pagers from our monthly billing cycle in the first half of 2022. Monetary savings will begin to be seen in six to nine months.

Removed a 30+ year old Nortel System and secondary telecom equipment which was hindering the completion of Farmington Hills’ corporate telephone refresh that started three years ago and is now complete.

Initiative to improve label printing experience for clinicians progressed:

- 506 printers completed at Troy
- 235 printers completed at Grosse Pointe
- 228 of 284 completed at Farmington Hills (start 6/20 – end 7/6)
- Royal Oak is on hold until August while we await the remaining printers’ arrival

748 PCs remain of the 3,000 PC refresh initiative.

Identity and Access Management Engineering implemented an automation process to enroll students and agency nurses into Duo multifactor authentication and send enrollment notification, as well as an ASCOM role-based group automation.

In line with policy, shredded 2,112 hard drives as part of technology lifecycle refresh. Devices were destroyed to protect against improper disclosure of protected or proprietary information.

Epic/*one*Chart DR environment was successfully switched to the Grand Rapids Data Center on June 5, to minimize risk during the ITC Data Center move by ensuring redundancy.

# Recent Accomplishments additionally noted

Risk Management removed three high-level/very high-level risks from the Risk Register. The remediation of these risks includes avoiding users having excessive rights due to multiple role assignments, server patching to alleviate known vulnerabilities, and incorporating Cylance protection to additional systems.

Information Security's Phishing Education May campaign was delivered via email to 33,000 workforce members the click rate was 1.3%, requiring follow-up education. 1,460 workforce members reported the phish campaign email to [phish@beaumont.org](mailto:phish@beaumont.org).

Launched a new user authorization form process for new independent private practice's new hires that will provide automation and a better customer onboarding experience.

Troy NICU renovation: Creation of new Department; Relocation/Renaming of Pyxis machine, renaming of Pyxis machine and associated med list

Progression rounds documentation is now available for nurses on Rover. Previously this documentation could only be completed in *oneChart* hyperspace. This will assist with patient throughput by making it easier for nurses to fill out the progression rounds information.

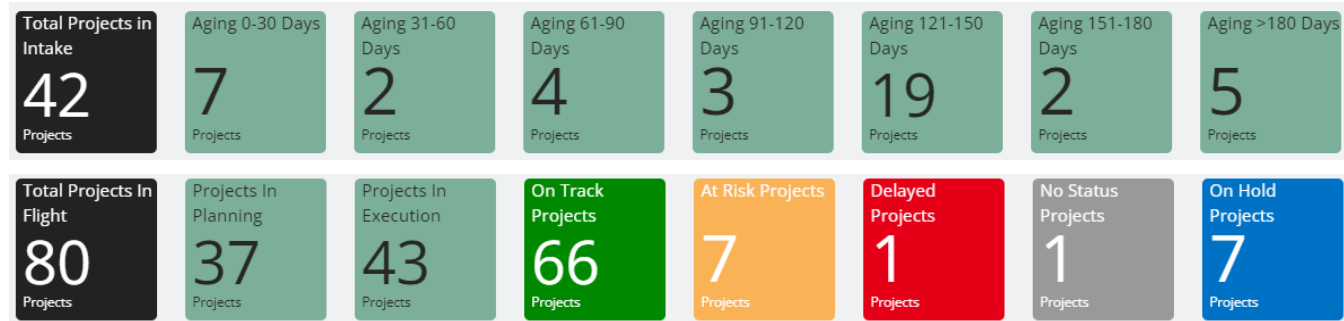

Precision Health went live with genetics studies. The process involves patients receiving an email link to a web page. They then can complete the acceptance to the program or schedule a meeting with a genetics counselor. Genetics tests are ordered, resulted and returned to the patient via MyChart.

GE Muse was successfully upgraded. This will improve user experiences and introduce new functionality.

Bugsy AMS build completed for RX Antimicrobial Stewardship, for the implementation. This includes; AMS dashboard, AMS Scoring Systems and Patient list/Reports, AMS Navigator.

# Best Moments, B*Extraordinary*, Silent Celebrations

*IT helps bring new life to refurbished equipment — to students around the world*

Did you know that when Beaumont laptops have ended their life of empowering our clinicians, they can be donated to continue to serve an extraordinary purpose, instead of being disposed of?

[Review this article](#) when connected to the Beaumont network for more details!

*Ever-inquisitive students at John Wesley looking over the new laptops.*

*David Contorer, D2N board member; Odis Bellinger, Building Better Men founder and director; Dr. Richard Keidan, D2N founder and director.*

"I submitted an IT ticket on Saturday for help getting Duo activated on my new phone. I heard back within 30 minutes and the person was great! Every time I have submitted a ticket the people have been responsive, courteous, and helpful! I'm always so pleasantly surprised because it's not what I have experienced with other companies."

*- Sharon Stanton, Internal Communications*

*A sampling of comments from [B\*Extraordinary\*](#) about IT team members:*

**Hari Prasad Rao Ponugoti and Deborah George**  
received recognition from Stephanie Bono for **Teamwork**

#### **Change to Journal Review Process**

Thank you to Debbie George & Hari Ponugoti for working through the change process for updating our journal reviews. Hari and Deb are always working to streamline our processes and help make our jobs easier. They work well as a team to create these changes. We appreciate Hari being a great partner to Corporate Accounting to achieve our goals. Thank you!

**Gopi Krishna Kurikala**  
received recognition from Brent Vasicek for **Excellence**

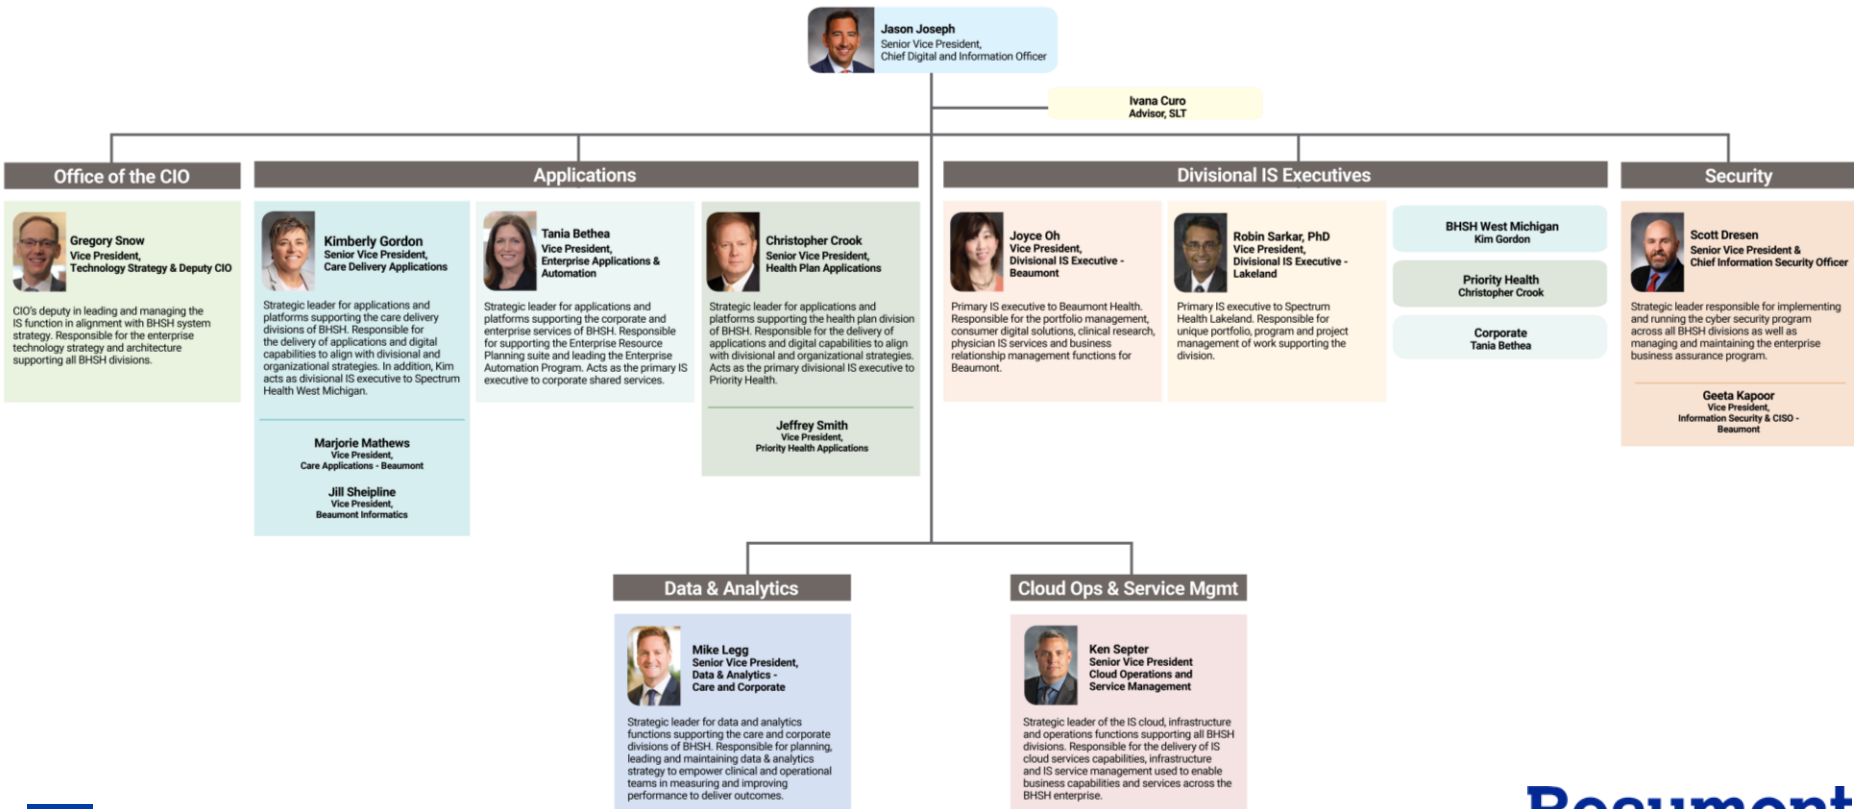

#### **OR Antibody Patient Report**

Gopi, Thank you so much for all the effort you put in to creating a query between SoftBank and Epic. The staff is excited as to the amount of time this will save in our department. Your perseverance and customer service were top notch. Brent
