

Legacy Beaumont web apps Continue Move to Corewell Health tenant and Single Sign On (SSO) access

Applications are continuing transition to the Corewell Health tenant from the Legacy Beaumont tenant and will experience some changes in how they authenticate logins. These applications will be moving in waves every week throughout May and June. After an app has transitioned, it can be accessed using the **Edge Corewell** and **Chrome Corewell browser icons** available on your desktop. The apps will be switching to Single Sign On authentication, also known as SSO, which uses your Corewell Health username and password to login. For more information on when these apps will be transitioning and what to expect, please visit the InSite page [here](#).
