

New process to request new Microsoft sites, groups starts Oct. 14

On Friday, Oct. 14, a new process will launch to request new SharePoint sites, Microsoft Teams, Planner Plans and Outlook Groups.

In preparation for the BSH System Microsoft 365 platform integration, this new process aligns Beaumont Health with Spectrum Health to ensure the most cohesive experience across the organization. Team members will no longer be able to create a new Team, Plan or Outlook group through individual Microsoft applications.

Additional information including training guides, webinars and online resources will be released in the coming weeks.

If you have questions, please contact Microsoft365@beaumont.org.
