

## **Epic/*oneChart* Sepsis Narrator and Navigator with system lists available for Dearborn, Trenton, Taylor and Wayne on Sept. 7**

Effective Sept. 7, for adult patients at Beaumont Dearborn, Taylor, Trenton, and Wayne acute care sites, additional tools will be available to combat sepsis morbidity and mortality. The tools listed below will assist both Inpatient and Emergency department clinicians with finding, identifying, treating, and following patients who are septic.

### ***What can the staff expect to see?***

- New Patient Lists with columns that indicate the sepsis predictive model score as well as what interventions are outstanding and completed for the treatment of sepsis
- New Sepsis Narrator for nurses to document interventions for septic patients
- New Sepsis Navigator for physicians to review and document the progress for septic patients. The six-hour note template will be included in the navigator
- New Sepsis Timer column on the ED Track Board to help the treatment team track how long the patient has been in the protocol

These functions will work in concert with the recently released Sepsis BPA to support a strong Sepsis tool kit for improved patient care and management.

### ***How do I get support?***

Educational materials are available on the [IT Education Nursing Bookshelf](#) near the bottom, as well as Nursing Learning Home Dashboards within *oneChart*. They will also reside on the [Nursing/Sepsis Intranet page](#)

Direct technical support will be available on Tuesday, Sept. 7, from 7 a.m. until 5 p.m. The Microsoft Teams go-live session below will be available to call or instant message for direct questions and issues.
