

## What would you do if Epic/*oneChart* is down?

During a *oneChart* downtime, the Read Only icon on Bhapps.beaumont.org allows workforce members to access in a read only environment.

In the event of a network or power outage, sites may be asked to use the designated downtime computers. It is imperative that these computers meet the following requirements to ensure they are operational during an outage:

- Wherever possible, the *oneChart* BCA downtime computer needs to be plugged into an emergency power outlet.
- The *oneChart* BCA downtime computer needs to have a printer plugged in via USB.
- Wherever possible, the printer also needs to be plugged into an emergency power outlet.
- Regularly validate that these computers have the “BCA printing” icon and ensure that the reports are appropriate for your department.

Preparation and practice are key to ensuring the continuity of patient care in the event *oneChart* is unavailable. For more information, [review the full \*oneChart\* downtime instructions document](#) and more on the [downtime instructions intranet page](#).
