

# Welcome Corewell Health to AMS Connect™

- **App Availability and Access:** AMS Connect™ uses Wi-Fi or Cellular, whichever is stronger. The app is available for use on any iOS or Android mobile devices as well as on computers via the web platform
- **Quick and Simple Set Up:** Just log in and you can immediately communicate with any of the 2000+ Corewell Health AMSC users already using the app. Simply search the user's name in the already established directory
- **Peer-to-Peer Messaging:** Compose and send a secure message, an instant two-way conversation
- **Read Receipts:** View the date & time a message was read by each recipient on all peer-to-peer messages
- **Group Conversations:** Create quick group conversations and add/remove additional people to conversations as needed
- **Status / Message Forwarding:** Designate yourself as Available, Busy or Off Duty. When Busy or Off Duty, select a covering colleague and your pages will automatically forward to them
- **Alert Sounds and Repeat Reminders:** Customize the alert tone and message repeat options for each type of incoming message
- **Ability to Send Attachments, Images and Voice Notes:** Yes! All within the secure container of the app
- **No Workflow Changes:** All messages that were sent to you via text/SMS will now be received in the secure app
- **Saved Messages:** Lost a phone? No problem. Messages are stored in the AWS cloud and can be accessed by logging in to AMS Connect™ from any computer

AMS Connect™  
is a HIPAA compliant  
mobile app for  
critical messaging

**Modern Reliable Secure**
