

# Enroll in Imprivata ID to e-prescribe controlled substances

Duo is being replaced by Imprivata ID. Don't delay – get enrolled today!

In preparation for our move to one shared Corewell Health instance of Epic, all providers will use Imprivata ID to verify their identity when e-prescribing controlled substances. This ensures that we meet DEA requirements, ensure data safety and compliance, provides cost savings, and furthers our integration goals to unite our three health systems.

## Enrollment has been extended through June 28

Don't delay – secure your appointment today! [Register here](#). Choose your preferred date and time, then look for a confirmation email and add this appointment to your calendar.

*The enrollment support team can only support a limited number of providers each day, so it is important to proactively sign up for your appointment to ensure a seamless enrollment experience.*

## Enrollment Tips

Download the Imprivata ID app. [Apple Store](#) | [Google Play](#)

Have your **government-issued ID and smartphone** with you at your appointment.

**Join virtual sessions via a computer with a webcam.** If you don't have one, you can join via computer and your smartphone or iPad to use its camera to show your ID.

## Remember!

Keep the Duo app on your smartphone for now. You will continue using Duo to verify your identity when e-prescribing until July 21 when the new Epic instance is launched.
