

CHE Inpatient & ED Providers – Dx Association

Intended Audience: ED and Inpatient Providers

Go-Live Date: 9/9/2024.

SUMMARY

Providers in ED and Inpatient spaces will now be prompted to associate a diagnosis upon signing an Imaging, Cardiac, Echo and EKG order. This change is resorting to legacy functionality.

The screenshot displays the Epic EHR interface for order entry. The main area shows three orders with their respective details and 'Modify' and 'Discontinue' buttons. An 'Associate Diagnoses' dialog box is open, showing the patient name 'Xwillowip, Joooney' and search fields for diagnosis and problem. A search result for 'Electrocardiogram, Complete' is displayed, and the 'Accept' button is highlighted. On the right side, a 'New Orders' panel shows the details of the selected order: 'Electrocardiogram, Complete', 'Routine, Once, today at 1509, For 1 occurrence', and 'Reason for Exam: t'.
