One Epic Ecosystem

On July 21st when the One Epic Ecosystem is launched, research will start using the research study record contained within EPIC. Information on the research study record can be found in **The Orchard**: <https://spectrumhealth.sharepoint.com/sites/OneEpicEcosystemChangeReadiness> Visit the Research

Apple. What are some of the new features we will be able to leverage in the research study record? We will be able to recruit patients via Epic MyChart, we can associate patients and encounters to an individual study, place research specific orders, write research notes, run study reports and document adverse events within Epic and link them directly within the participant's research study record. Lots of new features will be available to screen, recruit and follow our participants enabling us to increase enrollments and decrease lost to follow up.

Please contact **Pamela Sloan, RN, BSN**, Clinical Research Manager, SCTO at 248-551-6059 or Pamela.Sloan@corewellhealth.org for questions.

Did you know?

The CHE policy pertaining to Clinicaltrials.gov is on Policystat: [Registration of Clinical Trials](#). The policy describes posting requirements and support available to investigators at CHE. A decision tool is helps teams to determine if their IIR studies should be posted.

REDCap is a web-based database application specifically designed for clinical research. It is provided to Corewell Health Investigators at no cost. Contact our REDCap Administrator Donna McIntyre, (248.551.7599) for more information on how REDCap can support your study.
